

SNAP PORT INLINE

More Fun. Less Effort.

1 Two-Piece Design

Our innovative two-piece, hinged design allows for the easiest entry and exit experience of any port on the market.

2 Adjustable Rollers

The soft impact rollers can be adjusted based on varying PWC hull geometry to guide the watercraft on entry and exit.

3 Built-In Bow Stop

The built-in bow stop provides PWC operators a contact point when parking their watercraft for increased safety.

4 Universal PWC Port

Its 2460 lb operating capacity allows the Snap Port Inline to accommodate the largest 3-seater PWCs on the market.

5 Multiple PWC Storage

The Snap Port Inline, assembled with two Snap Port Extensions, will accommodate up to two PWCs, great expanding storage capacity.

Dealer Installations

“ The Snap Port Inline is such an easy solution in limited spaces or commercial use. With the same functionality of the two-piece design, the inline makes docking multiple pwcs even better and more practical without compromising the effortless ability to dock and undock your pwc. ”
